### **What makes Sobaken not the same as other flea and tick collars?**

Impressive technologies enables the collar to discharge very low, secure dosage amounts from the active components around extended amounts of time. These are transferred to your dog's

fur and skin, and distribute across their entire entire body to keep them protected against fleas and ticks for approximately 8-10 weeks.

## **Do you know the active substances in Sobaken?**

There are 2: imidacloprid, which gets rid of grownup fleas and flea larvae; and flumethrin, which repels and gets rid of all lifestyle steps of ticks. Equally components act on get in touch with with no need to mouthful.

## **Why am I nonetheless going to a flea on my small dog when they're using a Sobaken collar?**

Fleas might still jump on to your dog once they go prior them, even they're putting on a Sobaken collar. The lively elements work towards get in touch with, which means the fleas have to pick up into the hair to acquire in contact with the active ingredient. The fleas will become disorientated before dying and falling off, once they have jumped on. You might as a result sometimes also see fleas moving slowly and gradually or ticks tangled in your dog's hair.

## **My dog has started nibbling the collar, must i be anxious?**

They are not released or absorbed when the collar gets chewed, although mild gastrointestinal signs may be seen, as the vast majority of active ingredients are bound in the collar matrix and not on the surface. If your dog manages to get their own collar into their mouth it's likely that it is applied too loosely, nevertheless, you should avoid chewing, and. Ideally two fingertips in shape, placed toned between the collar plus your dog's neck area.

## **Is Sobaken safe for young puppies?**

It is safe to be used on pups old 7 months and older. Must I leave a gap between removing an old collar and wearing a replacement? No. It's essential to place it on without any hold off to assure a ongoing security of the dog.

## **My Sobaken collar doesn't scent whatsoever. Does this suggest it's no longer working effectively?**

Certainly not. Sobaken is odourless, so that you don't have to endure the unpleasant scents you usually affiliate with old flea and tick collars.

## **Other flea and tick collars call for stretching out to trigger them. Should I need to do this for Sobaken?**

No. Stretching out the collar for activation is not necessary. Once used, the productive elements in Sobaken are quickly spread during the entire overall body area to protect your dog.

## **Can the Sobaken collar be utilized next to normal collars?**

Absolutely. Sobaken may be donned along with your dog's common collar without the need of burning off efficacy, so long as the Sobaken collar is in touch with hair and skin.

## **My dog is damaging with the collar, leading to swelling and irritability. What should I do?**

If your dog isn't used to wearing a collar, there is a chance

that they might develop mild reactions such as itching, redness and hair loss. These signs normally disappear altogether in 1 or 2 days, without the need of taking out the collar, when your dog receives accustomed to using it. Sometimes, momentary collar removing could be advised till the signs or symptoms have vanished. In uncommon instances in dogs, application site side effects such as dermatitis, irritation, eczema or skin lesions may possibly arise and in these instances, collar eradication is suggested. Please consult your vet if the symptoms persist or become more severe.

## **What should I do if the collar gets dirty? Will a muddy collar continue to keep my dog protected from fleas and ticks?**

We have been not aware of mud owning an influence on the production in the active ingredients in Sobaken so therefore its efficacy. You can simply wipe it down with a moist cloth if the collar does get dirty.

## **May I connect a leash or a nametag to my Sobaken collar?**

If such accessories cover the collar's surface, Sobaken has not been specifically tested with such items, so we do not recommend attaching accessories to your dog's Sobaken collar, especially.

## **Is Sobaken dog collar h2o-tolerant? Do I need to remove the collar if my dog gets wet?**

Sobaken does not must be eliminated when a dog gets moist or perhaps is bathed. The energetic components are contained in

the collar matrix and will never be released into normal water. They spread through the lipid layer of the dog's hair and skin and even if this lipid layer is partially washed off by bathing, Sobaken will quickly replenish the active ingredients and the pet will be protected again. repeated, prolonged and However exposure to h2o or substantial shampooing ought to be prevented since the duration of process can be lowered.

## **How many times should i enable my dog swim when you use a Sobaken Collar?**

Sobaken is drinking water-resilient. It remains powerful adhering to going swimming, using a mild shampoo with non-detergent components, or being exposed to rainwater or sun light. There is absolutely no need to remove the collar for skating. Under standard problems, i.e. lower than one particular bath tub monthly, it's efficient for up to 8 several weeks; for pet dogs that swim or bathe regularly, the duration of action may be lowered.

## **If my dog gets its collar stuck on something, What happens?**

The two large and small Sobaken dog collars come with a ratchet discharge protection mechanism. So in the unlikely event of your dog being trapped, the collar will widen when they give it a hard pull, allowing for a quick release. The small dog collar has an additional safety mechanism as it is moreover built with a predetermined busting point, so a more challenging move will bust it.

## **The frequency of which do i need to look into the fit of your Sobaken® collar on a**

## **increasing dog?**

If necessary, puppies grow at different rates and we recommend frequent checks of the readjustment and collar.

## **How should I get rid of a Sobaken dog collar?**

Employed collars or any remnants should be wrapped in papers and placed in trash. This product must not enter in normal water courses.

## **Why does Sobaken possess a bright white natural powder on the surface, when obtained from the pouch?**

The white-colored powder is caused by stearic acid, a discharge agent utilized in the development approach to make it easier to launch the collar looking at the mold. Stearic acidity is safe plus rated for use in a few foods. The white powder normally disappears within a few days after application of the collar to your animal but if you prefer, you can simply wipe it off with a cloth.

## **Can I take away the collar for several several weeks and reapply it once again in the future? Will it nonetheless function?**

This method of app hasn't been tested and it may possibly have an impact on the degree of safety the family pet is provided with. To get the best flea and tick protection, Sobaken must be employed all year long. However, if you've removed the collar only temporarily (e.g. during grooming), you can reapply it without any problems.
